PROFESSIONAL SUMMARY

Product Designer with 11+ years in design, the last 5+ of them in end-to-end product UX ownership and the earlier years in visual and motion design. Takes features from discovery through launch: user research, information architecture, wireframing, high-fidelity prototyping, usability testing, and WCAG 2.1 AA interaction design within established design systems. Has independently designed, built, and shipped four products to the Google Play Store across four distinct domains — children's, healthcare, personal finance, and productivity — including a trilingual app for low-literacy users. Fluent in Figma, Adobe XD, and Miro, and experienced partnering with PMs and engineers in Agile teams to deliver measurable business outcomes.

WORK EXPERIENCE

Visual Designer

2021 – Present

IDrive India Pvt. Ltd., Bangalore

Full-time

- Applied design thinking principles to design user flows, wireframes, and interactive prototypes for internal product features, improving onboarding clarity and feature discoverability.
- Conducted user interviews, heuristic evaluations, and usability testing sessions to identify pain points and validate design decisions with cross-functional stakeholders.
- Designed WCAG 2.1 AA-compliant micro-interactions, UI animations, and responsive, mobile-first screens aligned with the product design system.
- Collaborated with PMs and engineers in Agile sprints to refine features using human-centered design principles and iterative feedback loops.
- Achieved 50-60% increase in user sign-ups through improved UX storytelling, UI clarity, and design consistency across key conversion flows.
- Produced interaction animations and motion design assets using Adobe After Effects and Rive to support product onboarding flows, feature highlights, and user engagement campaigns.
- Produced promotional and explainer video content and animated brand visuals for product launches and marketing campaigns using Adobe Premiere Pro and After Effects, maintaining visual consistency across product touchpoints.

Video Editor & Photojournalist

2015 – 2021

Coastaldigest.com

Full-time

- Designed structured content flows and visual hierarchies contributing to 50% readership growth.
- Built layout systems, information architecture, and accessibility-focused design patterns for digital content.

Documentary Editor & Content Strategist

2019 – 2021

Kalike (TATA Trusts)

Freelance

- Structured narrative content and improved user engagement for educational programs, achieving 70% program success impact.

Freelance Visual Designer & Motion Designer

2013 – 2021

- Designed marketing visuals, motion graphics, and interaction-aligned animations for diverse digital platforms.

Assistant Professor – Journalism

St. Joseph's College & Co-operative College, Pilathara

2015, 2020

Part-time

- Taught journalism, media theory, and content design; guided students through structured research and publishing workflows.
